

Industrial Training Presentation

Industrial Training at **Soft Tech Innovations**

Presented By –
Atharv Milind Suryavanshi

Department of Computer Science & Engineering
DKTE Society's Yashwantrao Chavan Polytechnic, Ichalkaranji
Academic Year: 2026 – 27

Introduction of the Organization

❖ About Soft Tech Innovations :-

- Established in **2011**
- Formerly known as **SoftTech Computer Training Institute**
- Head Office: **Kolhapur, Maharashtra**
- Branch: **Sangli (2024)**
- Provides software training and software development services
- Offers industry-oriented technical education through practical learning
- Conducts internships, certification courses, workshops, and live projects
- Focuses on Data Science, Data Analytics, Python, Power BI, Machine Learning, Web Development, and Generative Ai

❖ Vision :-

To provide practical, industry-oriented, and job-focused technical education while helping learners develop technical skills, confidence, and professional knowledge.

Objectives of Industrial Training

- **Objectives :-**

- ❖ Gain practical exposure to industry practices
- ❖ Apply classroom knowledge to real-world datasets
- ❖ Learn Data Science and Data Analytics concepts
- ❖ Develop Python programming skills
- ❖ Create business intelligence dashboards using Power BI
- ❖ Learn data cleaning and visualization techniques
- ❖ Improve analytical and problem-solving skills
- ❖ Develop professional communication and teamwork skills
- ❖ Prepare for future career opportunities

Technologies, Tools & Software Learned

➤ Programming

- Python

➤ Data Analysis

- NumPy
- Pandas
- Matplotlib
- Seaborn

➤ Business Intelligence

- Microsoft Power BI
- Power Query Editor
- DAX

➤ Development Tools

- PyCharm
- Google Colab
- VS Code
- Git
- GitHub

➤ AI Tools

- ChatGPT
- Google Gemini
- Microsoft Copilot

➤ Documentation

- Microsoft Word
- PowerPoint

Tasks and Projects Completed

❖ Practical Tasks

- Python programming exercises
- Object-Oriented Programming
- File handling and exception handling
- Data cleaning and preprocessing
- Exploratory Data Analysis (EDA)
- Feature engineering
- Data visualization
- Dashboard development
- Data transformation using Power Query
- Report creation using Power BI
- DAX calculations

❖ Project

- **Major Project 1 - Exploratory Data Analysis using Python**
 - Data cleaning
 - Data analysis
 - Data visualization
 - Report generation
- **Major Project 2 - Power BI Multipage Dashboard**
 - Interactive dashboards
 - KPI analysis
 - Business reports
 - Multiple report pages
 - Data visualization

Skills Acquired

❖ Technical Skills

- Python Programming
- Data Analysis
- Data Cleaning
- Data Visualization
- Business Intelligence
- Power BI
- Power Query
- DAX
- Git & GitHub
- Generative AI

❖ Professional Skills

- Communication
- Teamwork
- Time Management
- Problem Solving
- Presentation Skills
- Resume Building
- Professional Grooming

Challenges Faced & Solutions

Challenges	Solutions
Learning new programming concepts	Regular coding practice and trainer guidance
Cleaning real-world datasets	Used Pandas for preprocessing and handling missing values
Creating interactive dashboards	Practiced Power BI visualizations and report design
Writing DAX formulas	Learned through practical examples and assignments
Understanding AI tools	Explored ChatGPT, Gemini, and Copilot for learning and productivity

Key Learnings & Overall Experience

❖ Key Learnings

- Practical implementation of Data Science concepts
- Experience with real-world datasets
- Python programming for analysis
- Interactive dashboard development
- Business Intelligence concepts
- Data-driven decision making
- Professional work culture
- Industry best practices

❖ Overall Experience

- Successfully completed a **12-week industrial internship**
- Improved technical and professional skills
- Built confidence through practical assignments and projects
- Understood industry workflow and project development
- Strengthened career readiness in Data Analytics and Business Intelligence

Conclusion

- Successfully achieved all internship objectives.
- Enhanced knowledge of Python, Data Science, and Power BI.
- Gained practical experience through industry-based projects.
- Improved analytical thinking and problem-solving skills.
- Developed professional and communication skills.
- The internship provided a strong foundation for a career in **Data Science, Data Analytics, and Business Intelligence.**

Thank You

Questions & Answers
