

2026 EDITION · FREE RESOURCES

Data Analyst Roadmap

A clear, step-by-step path to becoming a job-ready Data Analyst — built entirely around free, high-quality learning resources. Follow the six tracks in order and build a portfolio as you go.

01 Python

02 SQL

03 Power BI

04 ETL

05 Databricks

06 Snowflake

Curated by [@databysumit](#)

Data · Analytics · Career Tips

► Follow [@databysumit](#)

How to use this roadmap: Work through the tracks top to bottom. Each track tells you **why** it matters, **what** to focus on, and a concrete **goal** to hit before moving on. Every resource linked below is free.

1 Python FOUNDATION

FOUNDATION

Why learn it? Python helps automate repetitive tasks, clean messy datasets, and perform advanced analysis.

FOCUS ON

Variables

Loops

Functions

Pandas

NumPy

Data Cleaning

GOAL

Analyze datasets and automate simple tasks.

Resource: youtu.be/XV-IlaO00H8

2 SQL CORE SKILL

CORE SKILL

Why learn it? SQL is the most important skill for Data Analysts because company data is stored inside databases.

FOCUS ON

SELECT

WHERE

GROUP BY

JOINS

CTEs

Window Functions

GOAL

Solve real SQL problems and become interview-ready.

Resource: [youtube.com/playlist · Complete SQL Series](#)

3

Power BI

VISUALIZATION

Why learn it? Power BI helps transform raw data into dashboards and business insights.

FOCUS ON

Data Modeling

Power Query

DAX

Dashboard Design

KPI Creation

GOAL

Build at least 3 portfolio dashboards.

Resource: [youtube.com/playlist · Power BI Full Course](https://www.youtube.com/playlist?list=PLvq7XcW9t6U8DQY0FmGKwZlRzHjCkLg)

4

ETL — Extract, Transform, Load

DATA FLOW

Why learn it? ETL is how companies move and prepare data before analysis.

FOCUS ON

Data Pipelines

Data Warehousing

ETL Concepts

Data Integration

GOAL

Understand how data reaches analysts.

Resource: [youtube.com/playlist · ETL Concepts](https://youtube.com/playlist?list=PLU6W7S083C9DQ)

BIG DATA

FOCUS ON

Data Engineering Concepts

CLOUD WAREHOUSE

FOCUS ON

Query Performance
